

VEEZU INSURE DASH CAMERA

As part of the Veezu Insure Terms and Conditions, you are required to have a forward facing dash camera in use at all times in the insured vehicle.

Veezu Insure provides a [322GW dash camera from Nextbase](#) with each policy sold for £90. The payment for this will be taken in four even amounts on your Weekly Access Fee Sheet at the same time as the inception of your insurance policy. The Driver Experience Team will be able to help you set up your dash camera and use the Nextbase app to access footage provided you purchase your dash camera from a Veezu Operator.

If you already have a dash camera, or wish to purchase your own elsewhere, you may opt out of purchasing a camera. In this instance, you must ensure your dash camera has the following minimum specification:

- 32GB SD Card
- GPS
- G-Sensor
- Loop recording
- Night vision
- Wi-Fi enabled

Please note, you'll be required to send us the dash camera footage in the event of any incident you contact us about.

The reason we recommend Nextbase is that their App and Cloud storage allows you to send us a link to a video of any footage without connecting to a PC, allowing you to focus on getting back on the road. We offer a very competitive market price for the [Nextbase 322GW](#), at only £22.50pw for four weeks.

Failure to send us footage when requested may result in a breach of your Veezu Insure Terms and Conditions, available here: www.veezuassist.co.uk/insure.
